

MOBILE CONCIERGE SERVICE

Body Sculpting Frequently Asked Questions

A plain-language overview of non-invasive body sculpting as offered through the Sozo Redefined Image mobile concierge service.

What is non-invasive body sculpting?

Non-invasive body sculpting refers to cosmetic techniques and devices used on the surface of the body to support contouring, skin tightening and lymphatic comfort. There is no surgery, no incision and no anesthesia.

What does mobile concierge mean?

Rather than asking you to travel to a clinic, SRI brings professional services directly to eligible clients in the comfort and privacy of their own home, on a schedule that fits a demanding calendar.

Who may be a candidate?

- Adults seeking cosmetic contouring support alongside healthy habits.
- Clients who value privacy, discretion and unhurried service.
- Clients who have discussed relevant health considerations with their own healthcare providers.

Who may not be a candidate?

Candidacy is confirmed during your personal consultation. Certain health conditions, pregnancy, implanted devices and recent procedures may make a service inappropriate. When in doubt, we defer to your licensed healthcare provider.

What should I expect during an appointment?

- Discreet arrival and professional setup in your space.
- A review of your comfort, goals and consent before beginning.
- A calm, unhurried session with clear communication throughout.
- Written aftercare guidance before we leave.

Is there recovery time?

Non-invasive services generally allow you to return to your normal day. Mild temporary redness, warmth or tenderness can occur. Your aftercare guidance explains what is expected and when to contact your healthcare provider.

How many appointments will I need?

There is no universal answer. A personalized appointment plan is created after your consultation and adjusted as we go.

Are results guaranteed?

No. Individual results vary and are not guaranteed. Body sculpting is cosmetic and is not a weight-loss program, medical treatment or a substitute for nutrition, movement and rest.

This guide is general education about a cosmetic service. It is not medical advice, diagnosis or treatment, and it does not replace care from your physician or other licensed healthcare providers.
